Nothing in particular, it was more for you in case there was something you needed. I'm fine with canceling. Mandy and I had discussed replacing it with a smaller political meeting if you think it might be helpful. If you are all set though it isn't necessary to do either. I'll cancel the tomorrow final prep session with OAR, let us know if you want to do the other meeting.

Aaron – Did you have anything in particular that you wanted to accomplish in tomorrow's final prep session? I feel like I am in good shape. I'm inclined to cancel it, unless there's a need from your side.

Still too early to tell, but it may be that we invoke cloture on Wehrum on Thursday, start the 30 hour clock, and then do the confirmation vote upon our return Monday. Still too many moving pieces to know for sure. If we can get him confirmed before we leave this week, we will. Depends on attendance and how much Dems drag their feet on the NLRB nomination.

Mandy,

I trust you have been busy since our meeting.

Please let me know if there is anything I can initiate from our end to get a proposed visit underway to a coal fired utility, in either Oklahoma or another state, by Administrator Pruitt.

I very much look forward to the opportunity to showcase how well our world class, EPA supported technologies, are working to keep the environment clean here in the USA.

Cheers,

Subject: Fw: Your panel date & time at A&WMA's 2017 ACE

Tauna, Mandy,

Please note the confirmed session timing, advance registration deadline for lower rates, hotel info, and conference info including technical program, etc.

As I said earlier, each panelist will have a maximum 20 minutes for his / her presentation and there will be a Q&A session at the end.

If you are going to have slides for your presentation, please email me a copy by June 2nd. Please also send me a paragraph or so on your bio sketch so that it can help me in introducing you.

If you have any questions, please let me know.

Thank you.

Subject: Your panel date & time at A&WMA's 2017 ACE

Dear Rahul Thaker,

You are designated as a participant in a panel session at Air & Waste Management Association's 110th Annual Conference & Exhibition (ACE) in Pittsburgh, PA, which runs June 5-8, 2017. Your panel session #260246 is scheduled for Thursday, June 8, 2017, from 8:00 AM to 9:40 AM ... Please plan to arrive 15 minutes prior to the beginning of your session to prepare and to upload any slides you may have.

A&WMA is a not-for-profit organization and has a policy that all participants attending the conference must register and pay a registration fee. If you have not done so yet, please register for the conference at <https://www.awma.org/ace2017registration>.

We offer one of our lowest rates for Speakers, Presenters, and Session Chairs. The **Advance Registration Deadline is May 2**, so register now to get lower rates! To defray the cost of registration, A&WMA also offers Monitor opportunities. In exchange for their service, Monitors are eligible for a complimentary technical program half day or full day registration based on the amount of time they are volunteering. For information about the Monitor program, please go to <https://www.awma.org/content.asp?admin=Y&contentid=256>, or contact Gloria Henning at glhenning@awma.org. All other registration questions should be directed to Gerald at garmstrong@awma.org.

The ACE Conference Website is at <https://www.awma.org/ace2017>. Click on the links in the left bar (or if your screen is narrow, scroll to the bottom of the page) to locate more information about the conference, such as registering, making your hotel accommodations, and obtaining the latest information on technical program. The Preliminary Program is now available, and the Final Program will be available soon. Please be sure to book your hotel room early to receive the group rate.

Thank you for all your hard work in preparing for the conference! We're looking forward to seeing you in Pittsburgh.

Best wishes,

Nancy & Lee

From: Woodward, Cheryl
Sent: Mon 4/24/2017 7:41:21 PM
Subject: FW: Scheduling

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Monday, May 1st at 3:30 pm. The instructions/directions to EPA is below and if you have any questions please contact me. Look forward to seeing you all.

Directions

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators and then do a small U-Turn to the right heading toward 12th street, the North Lobby entrance is directly and immediately to your left (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street and the Federal Triangle Metro sign can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the South Lobby of the William Jefferson Clinton building.

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Scheduled for October 10th and 11th in Arlington VA

Mandy:

Thank you so much for agreeing to Keynote A&WMA's Conference on Climate Change. The Conference is scheduled for Oct 10-11, 2017 in Arlington, VA and promises to be a great opportunity to exchange meaningful information on the current thinking relative to climate change and how we can mitigate any adverse effects and adapt to the potential consequences. The Association values EPA's thinking and is excited to provide the forum for discussion to our membership and other parties involved in the discussion.

Bill Wehrum said that you planned to check with Administrator Pruitt one last time to see if he was available to Keynote and it would be great if he wanted to speak. However, our intent at this time is to list you in the Program at the Keynote and then to send out a special mailing/notice announcing Administrator Pruitt as the Keynote should he decide to speak.

Cindy Fontanesi from A&WMA Headquarters in Pittsburgh will be in touch with you today to work out the details.

Again, thank you so much for agreeing to speak at our upcoming Conference.

Jeff Muffat

Subject: A&WMA's Conference "Finding Common Ground on Climate Change Mitigation and Adaption"
Scheduled for October 10th and 11th in Arlington VA

Mandy:

Thank you so much for agreeing to Keynote A&WMA's Conference on Climate Change. The Conference is scheduled for Oct 10-11, 2017 in Arlington, VA and promises to be a great opportunity to exchange meaningful information on the current thinking relative to climate change and how we can mitigate any adverse effects and adapt to the potential consequences. The Association values EPA's thinking and is excited to provide the forum for discussion to our membership and other parties involved in the discussion.

Bill Wehrum said that you planned to check with Administrator Pruitt one last time to see if he was available to Keynote and it would be great if he wanted to speak. However, our intent at this time is to list you in the Program at the Keynoter and then to send out a special mailing/notice announcing Administrator Pruitt as the Keynoter should he decide to speak.

Cindy Fontanesi from A&WMA Headquarters in Pittsburgh will be in touch with you today to work out the details.

Again, thank you so much for agreeing to speak at our upcoming Conference.

Jeff Muffat
Retired Manager of 3M Environmental Reg Affairs
Treasurer of Air & Waste Management Association
.

To: Gunasekara, Mandy <Gunasekara.Mandy@epa.gov>
Subject: Pellet Fuels/CAA section 111 rule

Mandy –

Just reaching out to see if you would be available for a short conversation concerning pending litigation on the wood heater/pellet fuel rule. This litigation is currently being held in abeyance at the D.C. Circuit based on the agreement of EPA and petitioners and without the objection of intervenors.

I represent the Pellet Fuels Institute (PFI); PFI separately challenged EPA's final standards for pellet fuel on the basis that they exceed the Agency's statutory authority under CAA section 111, are arbitrary and capricious and lack a sufficient administrative record. Since the current abeyance only extends until June, it would be helpful to discuss how we might be able to engage the Agency on this matter.

I am available by phone or in person to discuss this matter; whatever works on your end. I realize that your schedule is extremely busy, but believe that it will not take very long to lay out the very substantial issues that we believe are raised by the final rule.

Mandy,

Joe Stanko just let me know that he mentioned to you that one of my clients, GPA Midstream, has asked if we could set up a relatively short meeting to discuss greenhouse gas reporting requirements with you. Matt Hite, GPA's VP for Government Affairs has one of his members, Adrienne Sandoval from Andeavor, in town next week on Nov. 29th and 30th. I realize that is very short notice for someone with as busy a calendar as you. I thought, however, that since we'll be on a panel together at Hunton's Nov. 30th event, perhaps we could all meet a little before that. Of course, we can always set up a call or a different meeting date if you're fully committed.

Speaking of the Nov. 30th event, I'd be happy to coordinate with you on that if you'd like. In the meantime, I hope you have a great Thanksgiving.

Best,

Aaron

Hi Mr. Eames,

Mandy forwarded over your questions about arriving the day of. I am looping in Cheryl who will provide logistics to you. As for the length of the meeting, yes I had it set at 30 minutes but have extended it to 45 minutes. Thank you for advising on the topic!

Thank you!

Sydney Hupp

Subject: RE: Scheduling

When you and/or Sydney have a chance, please send information including the following:

1. Information required to enter the building.
2. Which entrance.
3. Room number.
4. Is he planning for 30 minutes or 60? I assume 30, but it's a complex topic.
5. Any specific points of emphasis you would like. We'll plan on a few basic illustrative slides but certainly can go into as great detail as he may desire.

Thanks again Mandy. Looking forward to it.

To: Gunasekara, Mandy <Gunasekara.Mandy@epa.gov>
Subject: Pellet Fuels/CAA section 111 rule

Mandy –

Just reaching out to see if you would be available for a short conversation concerning pending litigation on the wood heater/pellet fuel rule. This litigation is currently being held in abeyance at the D.C. Circuit based on the agreement of EPA and petitioners and without the objection of intervenors.

I represent the Pellet Fuels Institute (PFI); PFI separately challenged EPA's final standards for pellet fuel on the basis that they exceed the Agency's statutory authority under CAA section 111, are arbitrary and capricious and lack a sufficient administrative record. Since the current abeyance only extends until June, it would be helpful to discuss how we might be able to engage the Agency on this matter.

I am available by phone or in person to discuss this matter; whatever works on your end. I realize that your schedule is extremely busy, but believe that it will not take very long to lay out the very substantial issues that we believe are raised by the final rule.

Dang. I can't watch cspan live.

Huge congratulations.

I can't imagine what it's like to watch your confirmation. It was an incredible high walking off the floor after the final vote of a bill or amendment I got to work on. I miss the red benches.

Subject: RE: Coal technology

You mentioned three types of technology you would like to discuss:

- High efficiency low emission (HELE) technology
- Ultra supercritical technology (USC)
- Integrated gasification combined cycle (IGCC)

Here's some quick background.

- HELE technology is a broad category. Probably the two main technologies under HELE would be the other two categories above - USC and IGCC. There are other types, but those are the main two.
- USC needs some brief explanation. An "ordinary" coal-fired power plant is fired by pulverized coal. The coal is smashed into powder and combusted in a chamber. The heat turns water to steam, and the steam turns a turbine. Plants before about the mid-80s, I believe, were subcritical. They had an efficiency of turning coal into power of about 33%. Supercritical plants operate at higher temperature and pressure and might have an efficiency of 37-40%. Ultrasupercritical plants operate at even higher temperature and pressure and might have an efficiency of 45% or so. To get to the higher temperature/pressure you need different metallurgy, design, etc.
- IGCC doesn't burn the coal, it essentially bakes it under pressure. The result is a set of chemical streams - a syngas that gets burned to produce power, CO₂, and some other streams that typically are turned into fertilizer or its components.

There are only a few large IGCC facilities for electricity in the US: Edwardsport (Duke, IN), Polk (TECO, FL), and Kemper (Southern, MS). There are a number of smaller ones that use biomass.

Subject: Speaking Invitation

Mandy – The Utility Air Regulatory Group is an ad-hoc coalition of the Nation's leading fossil energy producers. UARG focuses on Clean Air Act-related regulatory issues. UARG is holding a meeting here at Hunton's offices in DC on the afternoon of June 22 and the morning of June 23. We would like to invite you to speak to the group at some point during the meeting.

Our agenda is flexible, so you can pick the time that works best. If it works for you, we suggest 2:00 on Thursday the 22nd.

We are interested in any Clean Air Act regulatory issue that you are willing and able to address. Topics of interest include the Clean Power Plan, the Mercury and Air Toxics Standard, regional transport, regional haze, and NAAQS/NAAQS implementation. We are not asking you to address pending litigation on any of these issues. We are interested in discussing only possible future regulatory action.

Please feel free to contact me if you have questions or need more information. Thanks for your consideration.

NEWS RELEASE

Luminant to Close Two Texas Power Plants

Decision a Result of Challenging Plant and Market Economics

IRVING, Texas — Oct. 13, 2017 — Luminant, a subsidiary of Vistra Energy (NYSE: VST), today announced that it will close two coal-fueled power plants in Central Texas: its two-unit Sandow Power Plant in Milam County and its two-unit Big Brown Power Plant in Freestone County. In total, approximately 2,300 MW of nameplate power will be taken offline in early 2018.

These two plants are economically challenged in the competitive ERCOT market. Sustained low wholesale power prices, an oversupplied renewable generation market, and low natural gas prices, along with other factors, have contributed to this decision.

Curt Morgan, Vistra Energy's president and chief executive officer, said, "This announcement is a difficult one to make. It is never easy to announce an action that has a significant impact on our people. Though the long-term economic viability of these plants has been in question for some time, our year-long analysis indicates this announcement is now necessary. These employees have kept both plants reliably powering Texas for decades, and we greatly appreciate their service."

Sandow Site

Earlier this week, the company and Alcoa entered into a contract termination agreement pursuant to which the parties agreed to an early settlement of a long-standing power and mining agreement. In consideration for the early termination, Alcoa made a one-time payment to Luminant. The settlement follows a decrease in wholesale power prices in ERCOT and the prior closure of Alcoa's smelter operation next to Sandow. The contract has helped shield Sandow from significant exposure to the downturn in the wholesale power market; however, the standalone economics of the Sandow complex no longer support continued investment in the site in this low wholesale power price environment.

Also closing will be Three Oaks Mine, located primarily in Bastrop County, which supports this plant.

Luminant estimates that approximately 450 employees will be impacted by the Sandow plant and Three Oaks mine closure. Eligible and affected employees will be offered severance benefits and outplacement assistance.

As part of the closure process, today Luminant filed a 90-day notice of suspension of operations with ERCOT, which will trigger a 60-day reliability review. If ERCOT determines the Sandow units are not needed for reliability following this 60-day review, Luminant expects to cease plant operations on Jan. 11, 2018.

Luminant will take the necessary steps to responsibly decommission the facility in accordance with all federal and state regulations. In addition, ongoing reclamation work will continue at Three Oaks Mine.

Big Brown Site

Over the last few years, the Big Brown team has made tremendous operational adjustments to remain viable given the challenging market conditions. However, despite these best efforts, the economics of operating Big Brown do not make it a sustainable option for our fleet. The company will explore a sales process for the site during the ERCOT notification period.

Turlington Mine, which supplies Big Brown, was already scheduled to wind down operations by the end of 2017. Reclamation work will continue there.

Luminant estimates that about 200 employees will be impacted by the Big Brown closure. Eligible and affected employees will be offered severance benefits and outplacement assistance.

As part of the closure process, today Luminant filed a 120-day notice of suspension of operations with ERCOT, which will trigger a 60-day reliability review. Luminant is extending the 90-day notice to 120 days to permit a more complete sales process and give ERCOT additional time to conduct their reliability analysis. If ERCOT determines the Big Brown units are not needed for reliability following the 60-day review, and if the site has not been sold, Luminant expects to cease operations on Feb. 12, 2018.

Financial Impact

Vistra expects to record one-time charges of approximately \$70 to 90 million in the fourth quarter of 2017 related to the expected retirements, including employee-related severance costs and non-cash charges for writing off materials inventory and a contract intangible asset associated with Sandow 4. We expect to record additional one-time charges in the fourth quarter of 2017 related to changes in the timing and amounts of asset retirement obligations for mining and plant-related reclamation obligations at these facilities.

About Vistra Energy

Vistra Energy is a premier Texas-based energy company focused on the competitive energy and power generation markets through operation as the largest retailer and generator of electricity in the growing Texas market. Our integrated portfolio of competitive businesses consists primarily of TXU Energy and Luminant. TXU Energy sells retail electricity and value-added services (primarily through our market-leading TXU Energy™ brand) to approximately 1.7 million residential and business customers in Texas. Luminant generates and sells electricity and related products from our diverse fleet of generation facilities totaling approximately 18,000 MW of generation in Texas, including 2,300 MW fueled by nuclear power, 8,000 MW fueled by coal, and 7,500 MW fueled by natural gas, and is a large purchaser of renewable power including wind and solar-generated electricity. The company is currently developing one of the largest solar facilities in Texas by capacity.

Hearth, Patio & Barbecue Association's (HPBA) Report on the Size of the U.S. Biomass Hearth Appliance Industry

ABOUT HPBA

Based in Arlington, Virginia, HPBA is the principal national industry association representing manufacturers, retailers, distributors, representatives, service firms, and allied associates for all types of hearth, barbecue, and patio appliances, fuels, and accessories, including solid fuel-fired home heating appliances (e.g. woodstoves, pellet stoves, hydronic heaters, and warm air furnaces). With 2,200 member companies, the association provides professional member services and industry support in education, statistics, government relations, marketing, advertising, and consumer education.

BACKGROUND

To determine the number of jobs provided by the U.S. biomass hearth appliance industry, HPBA contacted manufacturers of biomass hearth appliances as well as all known (both HPBA members and non-members) retailers, distributors, manufacturers' representatives, servicers, and chimney sweeps. The manufacturer population is limited to manufacturers of wood and pellet stoves and inserts, hydronic heaters, and wood furnaces (i.e. forced-air furnaces). All of these product types are regulated by the EPA's New Source Performance Standards (NSPS) for New Residential Wood Heaters, New Residential Hydronic Heaters and Forced-Air Furnaces (80 Fed. Reg. 13672. (March 16, 2015)) ("NSPS"). Almost the entire industry is comprised of small businesses who serve rural communities.

FINDINGS

HPBA estimates that the biomass hearth industry provides about **38,250 jobs** in the United States. Table 1 provides a breakdown of employment numbers by business type.

TABLE 1. ESTIMATED U.S. BIOMASS HEARTH INDUSTRY EMPLOYMENT BY BUSINESS TYPE

Business Type	Estimated U.S. Employment
Biomass hearth appliance manufacturers	6,200
Biomass hearth non-manufacturers (retail, distribution, manufacturers' reps, service/sweeps)	30,000
Wood pellet production	2,050
Total	38,250

METHODOLOGY

A combination of primary data collection and comparative analysis from secondary data sources was used to calculate the estimated number of U.S. jobs potentially affected by the NSPS. For primary data collection, a non-scientific census was conducted between May 1, 2017 and May 30, 2017 asking hearth manufacturers and non-manufacturers to provide their employment figures (all employees on their payroll, both full-time and part-time) from 2016. Over 500 companies responded and represent a little over 12,000 jobs.

Establishing estimates for the entire categories required filling in the gaps on census non-respondents as well as companies not contacted.

Calculating Manufacturer Employment Levels: Average manufacturer employment was calculated using HPBA dues class data. HPBA membership dues classes are determined for each HPBA manufacturer member by a company's reported calendar year sales in North America (U.S., Canada, Mexico). Non-respondent manufacturers were assigned the average as their estimate based upon their HPBA dues class.

From a secondary resource analysis perspective, for manufacturers, an average number of employees per unit shipped were calculated using data collected under HPBA's hearth shipment program cross referenced with US Census' Annual Survey of Manufacturers report. This was then cross referenced with the HPBA employment census to calculate the total size of the hearth manufacturing industry. This combination of values was input to create a manufacturer employment estimate.

Calculating Non-Manufacturer Employment Levels: Similar secondary data for the non-manufacturing jobs was collected using Dun and Bradstreet employment and installation information by relevant NAICS codes, National Retail Federation employment and industry data, and Bureau of Labor and Statistics data. Cross referencing these data sets with submitted employment figures and using created estimates for non-responding companies by calculated average employment by business type (distributors, manufacturers' representatives, retailers, and servicers/sweeps) yields the total non-manufacturer employment figure.

Source of Pellet Production Employment Figure: Pellet production job figures come from Energy Information Administration (EIA). EIA collects pellet production employment information numbers along with pellet production volume information from pellet fuel manufacturers as part of the Densified Biomass Fuel Report (Form EIA-63C) which was first launched in January 2016.
